The lake you live on and enjoy using is truly a gift and not to be taken for granted. The associations' purpose is not to be policemen but to watch out for changes in the water quality and to slow down and manages as possible, the invasion of harmful weeds. Our committee members work hard to collect water samples and track the results for water quality data/trends. This lake belongs to everyone who lives here and everyone needs to be involved. Please attend the meetings, pay your dues, learn of the different weeds, the work involved, and the expenses to managing them. We always need helping hands!! Thank you and kind wishes for a healthy and safe 2021... As a new resident or one who has drifted from the association, consider this: We are stewards of the land and lake we live on and use. We are responsible for its future!

Lake Shirley Improvement Corporation is a non-profit corporation under the provisions of section 501 (c) (3) of the Internal Revenue Code.

Thank you for your continued participation and support! Joanna Bilotta-Simeone LSIC President
